Answers.

Count () funtion

① Select Count (*) As total_employees
From employees;

Total employees

10

② Select Sum (salary) As total_IT_Salary
From employees
Where department = 'IT';

total_IT_Salary
220000
(55000+53000+62000+50000 = R220.000)

Sum() funtion

③ Select AVG (salary) As avg_hr_Salary
from employees
where department = 'HR';

Avg_hr_Salary
49500
(48000+51000=99000; 99000/2 = 49500

Min() and Max() functions

(4)

```
Select max(salary) AS highest_salary,
       Min(salary) AS lowest_salary
From employees
```

Highest_salary	lowest_salary
62000	48000

(5) Group By Statement

```
Select department,
Sum(salary) AS total_salary
from employees
Group by department;
```

department	total_salary
IT	22000
Finance	114000
Marketing	105000
HR	99000

Group By and Count

(6)

```
Select city,
Count(*) AS employees_count
From employees
Group by city;
```

City	employees_Count
Chicago	3
Los Angeles	1
San Francisco	4
Houston	2

7 Group By and Order By

```
Select department,
  AVG (salary) As avg_salary
From employees
Group by department
Order by avg_salary Desc;
```

department	avg_salary
Finance	57000
IT	55000
Marketing	52500
HR	49500

8 Having Clause

Write a SQL query to find departments where the ~~total~~ salary paid exceeds 100,000 (use Group By and Having)

```
Select department,
Sum (salary) As total_salary
From employees
Group by department
Having ~~(sum~~ (salary) > 100000;
```

department	total_salary
IT	220000
finance	114000
Marketing	105000

9 Combining Group By Having and Order By

```
Select city,
Count(*) As employee_Count
from employees
Group By city
Having Count(*) > 1
Order by employee_Count Desc;
```

City	employee_Count
San Francisco	4
Chicago	3
Houston	2

10 Combining Aggregate functions

```
Select department,
Avg(salary) As avg_salary
From employees
Group by department
Order by avg_salary Desc
Limit 1;
```

department	avg_salary
Finance	57000
